## Review report on condensed consolidated interim financial information to the Board of Directors of National Bank of Fujairah PJSC

---

### Introduction

We have reviewed the accompanying condensed consolidated interim statement of financial position of National Bank of Fujairah PJSC ("the Bank") and its subsidiaries (together referred to as "the Group") as at 31 March 2024 and the related condensed consolidated interim statements of income and comprehensive income, cash flows and changes in equity for the three-month period then ended and other explanatory notes. The Directors are responsible for the preparation and presentation of this condensed consolidated interim financial information in accordance with International Accounting Standard 34 – Interim Financial Reporting ("IAS 34"). Our responsibility is to express a conclusion on this condensed consolidated interim financial information based on our review.

---

### Scope of review

We conducted our review in accordance with International Standard on Review Engagements 2410, 'Review of interim financial information performed by the independent auditor of the entity'. A review of condensed consolidated interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

---

### Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying condensed consolidated interim financial information is not prepared, in all material respects, in accordance with International Accounting Standard 34 "Interim Financial Reporting."

The Company was established on 31 January 2017 to provide support services to the Bank to enter into foreign exchange and derivative transactions with financial institutions / counterparties under the terms and conditions of International Swaps and Derivatives Association (ISDA).

The condensed consolidated interim financial information for the three month period ended 31 March 2024 comprise the Bank and its subsidiaries (together referred to as 'the Group').

The registered address of the Group is Hamad Bin Abdullah Street, P. O. Box 887, Fujairah, United Arab Emirates.

### 2. Basis of preparation

#### Statement of compliance

The condensed consolidated interim financial information has been prepared in accordance with IFRS Accounting Standards, International Accounting Standard (IAS) 34: Interim Financial Reporting as issued by International Accounting Standard Board (IASB).

This condensed consolidated interim financial information does not include all the information and disclosures required for full annual consolidated financial statements prepared in accordance with IFRS and should be read in conjunction with the Group's consolidated financial statements as at and for the year ended 31 December 2023.

In preparing this condensed consolidated interim financial information, significant judgments made by the management in applying the Group's accounting policies and the key sources of estimation were the same as those that were applied to the consolidated financial statements as at and for the year ended 31 December 2023 except for the new judgements and estimates explained in Note 3.

### 3. Material accounting policies

#### Changes in accounting policies

The accounting policies adopted in the preparation of the condensed consolidated interim financial information are consistent with those followed in the preparation of the Group's annual consolidated financial statements for the year ended 31 December 2023, except for the adoption of the new applicable standards and amendments to the published standards effective as of 01 January 2024.

#### New and revised IFRS adopted in the condensed consolidated interim financial information

The following amendments to existing standards and framework have been applied by the Group in preparation of these condensed consolidated interim financial information. The adoption of the below did not result in changes to previously reported net profit or equity of the Group.

Descriptions	Effective from
• Amendments to IFRS 16 – Lease liability in a sale and leaseback	1 January 2024
• Amendment to IAS 1 – Non-current liabilities with covenants	1 January 2024
• Amendment to IAS 7 and IFRS 7 – Supplier finance arrangements	1 January 2024
• Amendments to IAS 21 – Lack of Exchangeability	1 January 2024

#### Standards, amendments and interpretations issued but not yet effective and not early adopted

A number of new standards and amendments to standards are effective for annual periods beginning after 1 January 2024 and earlier application is permitted; however, the Group has not early adopted them in preparing these condensed consolidated interim financial information. The Group is constantly assessing the impact of these standards, interpretations and amendments on the future financial statements and intends to adopt these, if applicable, when they become effective.

### 4. Financial risk management

The Group's financial risk management objectives, policies and procedures are consistent with those disclosed in the audited consolidated financial statements as at and for the year ended 31 December 2023.

#### (a) Fair value measurement principles

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

When available, the fair value of a financial instrument is based on quoted market prices in an active market for that instrument. A market is regarded as active if quoted prices are readily and regularly available and represent actual and regularly occurring market transactions on an arm's length basis. If a quoted market price is not available or if a market for a financial instrument is not active, the fair value is determined by using valuation techniques. Valuation techniques include net present value techniques, discounted cash flow methods, comparison to similar instruments for which market observable prices exist. For investments under management with external fund managers, fair value is provided by the external fund managers, and is determined based on the market value of underlying investments of each fund. In all other cases, the instruments are measured at acquisition cost, including transaction cost, less impairment losses, if any.

Where discounted cash flow techniques are used, estimated future cash flows are based on management's best estimates and the discount rate is a market-related rate at the date of the condensed consolidated interim statement of financial position for an instrument with similar terms and conditions.

Fair values reflect the credit risk of the instrument and include adjustments to take account of the credit risk of the Group and the counterparty, where appropriate. Fair value estimates obtained from models are adjusted for any other factors, such as liquidity risk or model uncertainties; to the extent that the Group believes a third-party market participant would take them into account in pricing a transaction.

The fair value of derivatives that are not exchange traded is estimated at the amount that the Group would receive or pay to terminate the contract at the date of the consolidated interim statement of financial position, taking into account current market conditions and the current creditworthiness of the counterparty.

#### (b) Fair value hierarchy

The Group measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

- Level 1: Quoted market price (unadjusted) in an active market for an identical instrument. A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry, group, pricing service or regulatory agency, and those prices represent actual and regularly recurring market transactions on an arm's length basis.
- Level 2: Valuation techniques based on observable input, either directly (i.e., as prices) or indirectly (i.e., derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.
- Level 3: Valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

Pursuant to disclosure requirements of IFRS 7 Financial Instruments: Disclosures, the Group has disclosed the relevant information in the table below:

Fair value of investments and Islamic instruments measured at amortised cost amounted to [AED 5,086.2 million](#) (31 December 2023: AED 4,992.4 million). Management considers that the carrying amounts of all other assets and liabilities measured at amortised cost in this condensed consolidated interim financial information approximate their fair values.

The Group performed a detailed analysis of its business models for managing financial assets and analysis of their cash flow characteristics.

#### (e) Market risk

##### Derivative financial instruments

In the ordinary course of business, the Group enters into various types of derivative transactions that are affected by variables in the underlying instruments.

A derivative is a financial instrument or other contract with all three of the following characteristics:

- its value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract (sometimes called the 'underlying');

### 4. Financial risk management (continued)

#### (e) Market risk (continued)

##### Derivative financial instruments (continued)

- (ii) it requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors; and
- (iii) it is settled at a future date.

Derivative financial instruments which the Group enters into includes forward foreign exchange contracts, interest rate derivatives, commodity derivatives and currency options.

The Group uses derivative financial instruments for hedging purposes as part of its asset and liability management activities in order to reduce its own exposure to fluctuations in interest rates.

The Group uses interest rate swaps to hedge interest rate risks. In all such cases, the hedging relationship and objectives including details of the hedged item and hedging instrument are formally documented and the transactions are accounted for based on the type of hedge.

The Group's exposure to interest rate swaps designated in hedge accounting relationships represents an amount of AED 530.3 million (31 December 2023: AED 210.8 million). The objective of the majority of these hedges is to reduce fluctuations from interest rate risk and is consistent with the overall interest rate risk management strategy of NBF.

The following table shows the positive (assets) and negative (liabilities) fair values of derivative financial instruments:

#### 8.6 Risk mitigation, credit quality, collateral and credit enhancements

In line with Basel and IFRS 9 standards, the Credit Risk Management Framework (“CRMF”) outlines the basis pertaining to the eligibility, valuation, roles & responsibilities of various departments and overall management of collateral in order to adopt effective credit risk mitigation mechanism and maximize the use of eligible collateral.

The eligible collateral under IFRS 9 helps in arriving at EAD and LGD for Expected Credit Loss (ECL) calculations. As for measuring ECL, the expected cash shortfalls will reflect via LGD the cash flows expected from collateral realization provided the same are as per contractual terms.

The Group manages credit exposure by obtaining security where appropriate, and in certain cases, the Group may also close out transactions or assign them to other counterparties to mitigate credit risk.

### 8. Loans and advances and Islamic financing receivables (continued)

#### 8.6 Risk mitigation, credit quality, collateral and credit enhancements (continued)

The amount and type of collateral depends on assessments of the credit risk of the counterparty. The types of collateral mainly include cash, guarantees, stand-by letter of credit (bank guarantee), pledge over listed shares and mortgage and liens over properties or other securities over assets. Pledged interests over vehicles, ships and equipment are also obtained. Collateral generally is not held against non-trading investments and due from banks and financial institutions.

Management monitors the market value of collateral, and wherever necessary the Group requests additional collateral in accordance with the underlying agreement, and considers collateral obtained during its review of the adequacy of the allowance for impairment losses.

Estimates of fair value are generally assessed on a periodic basis in accordance with the respective credit policies.

The credit quality of the loans and advances and Islamic financing receivables is managed by the Group using internal credit ratings comprising 22 grades. The risk rating system is used as a credit risk management tool whereby any risks taken on the Group's books are rated against a set of predetermined standards which are in line with the Central Bank of the UAE guidelines.

The Group's Credit Risk Rating Methodology reflects its assessment of the probability of default of individual counterparties mapped to the ratings specified by the External Credit Assessment Institutions (ECAIs). The mapping is based on a statistical model which takes into consideration the industry weights, country specific factors and the sensitivity of the counter party to systematic risk. Risk classification distribution by risk grades is presented below:

### 18. Capital adequacy ratio

The Bank's risk weighted assets (RWA) are weighted on the basis of relative credit, market, and operational risks. Credit risk includes both on and off-balance sheet risks. In accordance with the Basel III Compliance – Standardized Approach, the Bank is following the standardized measurement approach for credit, market and operational risk, under the existing Pillar 1 of Basel III requirements with the addition of the respective changes pertinent to capital supply.

The quantitative requirements, based on the regulations / guidelines, have been detailed below:

- i. Total regulatory capital (net of regulatory adjustments) – at least 10.5% of risk weighted assets (RWAs) – comprises of two tiers:
  - a. Tier 1 capital – at least 8.5% of RWA, composed of:
    - Common equity Tier 1 (CET1) – at least 7.0% of RWA; and
    - Additional Tier 1 (AT1)

Common equity Tier 1 (CET1) includes ordinary share capital, statutory reserve, special reserve, retained earnings and fair value reserves relating to unrealized gains on investments classified as FVOCI / available-for-sale with a hair-cut of 55%; and Additional Tier 1 (AT1) comprises of Tier 1 capital securities.
  - b. Tier 2 capital  
It includes collective impairment provision and sub-ordinated facilities. Collective impairment provision, including impairment reserve general, shall not exceed 1.25% of total credit risk weighted assets.
- ii. Banks must maintain a Capital Conservation Buffer (CCB) of 2.5% of RWAs in the form of CET1 capital. CB UAE may also require banks to implement Countercyclical Buffer (CCyB), to protect the banks from periods of excess aggregate credit growth. CCyB must be met by using CET1 capital and the level may vary between 0 - 2.5% of RWAs.

### 22. Taxation

#### Implementation of UAE Corporation Tax Law and application of IAS 12 Income Taxes

On 09 December 2022, UAE Federal Decree Law No. 47 of 2022 was published setting in place a general corporate income tax for the first time. The taxable income threshold, of upto AED 375,000 will be taxed at 0% and beyond AED 375,000 will be taxed at 9%, will apply as clarified via Cabinet Decision No. 116 of 2022 published on 16 January 2023; and at this point the tax law was considered enacted and substantively enacted for accounting purposes. The UAE Tax Law has confirmed the application of the Corporate Tax ('CT') to tax periods commencing on or after 01 June 2023. Therefore, NBF's effective date of applying the CT regime is the current financial year commencing from 01 January 2024. NBF has considered the timelines of Corporate Tax registration in accordance with the FTA decision No. 3 of 2024 and has started its registration process. Current taxes are now payable for the year starting 01 January 2024 potentially leading to a corresponding impact on deferred tax liabilities and assets; where the carrying amount differs from the tax base.

Whilst a number of Tax Guides have been issued by the Federal Tax Authority to help taxable persons understand the provisions of the CT law, it is expected that further guides would be issued in the coming periods to provide further clarity on the application and interpretation of the UAE Tax Law. This will be monitored closely by the management to assess any relevant impact on NBF's tax position.

Based on the review and assessment, deferred tax asset has been recognized, amounting to **AED 0.926 million** as at 31 March 2024, arising from items that may be reclassified subsequently to the statement of income, from other comprehensive income perspective. Further, the current tax impact has been calculated considering the potential adjustments which has resulted in an effective tax rate of **8.63%**.

The following table provides an analysis of the Group's tax expense related to current tax and deferred tax:

	<b>31 March 2024 AED'000 Unaudited</b>
<b>Tax expense</b>	
<b>Current tax</b>	
Current tax on profits for the period	24,649
<b>Deferred tax</b>
